

The Keeper of Knowledge

EASY / STANDARD

-X. X is half the number of Rezeki in play (rounded up).

-2. If you fail, the nearest **Program** enemy with patrol disengages from all investigators and moves once towards its patrol target.

-3. If you fail, gain 2 tags.

-4. If you fail, exhaust your Brain-Machine Interface and you must switch from cyberspace to meatspace or vice versa.

1/77 Ⓛ 124

Blue Level Clearance

More paranoid citizens allege that bioroids keep vids and audials of their owners for upload to Haas-Bioroid during maintenance.

When checking the doom threshold, ignore doom on other cards.

Forced – At the end of the mythos phase: Resolve 2 security breaches.

Forced – After the enemies attack step of the enemy phase: Each ready **Program** enemy deals its horror value to an **Asset** asset as its location. If it cannot and it has not moved this phase, resolve its patrol/hunter keyword (*if it has one*).

5

Illus. Ethan Patrick Harris

LOCATION

5

Metspace.

► : **Resign.** You've done what you can. You leave the professor to his own matters.

Forced – After you discover the last clue here: Read the set-aside Character Assassination story card. (Group limit once per game.)

7/77 Ⓛ 130

Agenda 1a

Red Level Clearance

Other directives are believed to exist; often these concern the behavior of a specific model.

When checking the doom threshold, ignore doom on other cards.

Forced – At the end of the mythos phase: Resolve a security breach.

Forced – After the enemies attack step of the enemy phase: Each ready **Program** enemy deals its horror value to a **Program** asset as its location. If it cannot and it has not moved this phase, resolve its patrol/hunter keyword (*if it has one*).

4

Illus. Ethan Patrick Harris

Act 1a

Independent Thinking

The Professor has promised you the findings of his research and needs you to protect him while he's working.

Cyberspace locations are connected to each location adjacent to it.

Forced – When an investigator is eliminated: They keep their clues, instead of placing them on their location.

Objective – Defend the Professor while he makes his final software adjustments. In the meantime, collect and keep as many clues as you can.

5/77 Ⓛ 128

Encrypted Vault

4

Illus. Samoutelle

Meatspace. Console.

► Spend 1 clue: Move your cyber avatar to any revealed cyberspace location.

Forced – If there are no clues here: Add clues here until there are 3 clues here.

*"Once you have achieved perfection, what's next?"
—The Professor*

"Oh interesting... Although on the surface, the digital signatures present imply the attacker is Vovo Ozetti, the code is written in an entirely different idiom, as if someone was trying to appear as him."

Resolve 5 security breaches.
(From now on, at the end of the mythos phase, resolve **two** security breaches.)

AGENDA
2ND

Activation Computer

Monolith

LOCATION

Meatspace. Console.

SYNC owns the hubs that direct Network traffic. Even the access point in an individual's home is corporation property, and altering the hardware or software in any way is a crime. In practice, the law isn't much enforced; plenty of tinkerers tweak or even rewrite entirely the hub to optimize its performance.

Illus. Emilio Rodriguez (Edited)

Encrypted Vault

④

LOCATION

Cyberspace.

Regardless of how one accesses the Network, PADs and other devices require a memory source to store the programs, apps, and system data essential for everyday operation. Holographic memory, commonly referred to as holo-mem, continues to be the most popular form of data storage for small devices such as PADs.

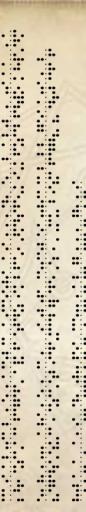

Illus. Scott Uminga

You hear The Professor's voice ringing in cyberspace, "I think I know who it is, that with man. The hallmarks are there. I sometimes wonder what I did to him that would have led to this. Vovo seemed perfectly pleasant, even shared his tea with me on the times we bumped into each other on breaks. Thank you for your help thus far, I estimate I'm just over a third done."

Resolve 2 security breaches.

AGENDA
1ST

Vovo Ozetti

You focus and find you are still in the university apartment. Checking your cyberspace location, you are still in the servers you were in before also. The Professor continues to work on his task. You shake it off and continue with your task before he gets overwhelmed.

Mark 1 assimilation in your Campaign Log. (Max once per game.)

137

Cyberwarfare

Any investigator can trigger the abilities on this card, regardless of location.

Spend 1 clues: Place 1 resource (*from the token pool*) on this card, as a cycle.

During your turn: Install a program from the repository at a revealed cyberspace location.

During your turn: Return a **Program** asset in play to the repository.

To install a program from the repository, spend the requisite number of cycles from this card to put that **Program** asset into play at a revealed cyberspace location. Max 1 **Program** asset at each location.

❖ 1 cycle: Mayfly.

❖ 2 cycles: Algernon.

❖ 2 cycles: Rezeki.

❖ 4 cycles: Darwin.

❖ 6 cycles: Aumakua.

Program assets defeated by horror are returned to the repository.

Illus. Seage

20/77

138

Security Breaches

Security breaches cannot be canceled.

To resolve a security breach, an investigator must draw the top card of the intrusion deck and spawn the enemy at its spawn location. For enemies with a random spawn location, reveal an intrusion token from the intrusion bag and seal it on the enemy. The breach point with that symbol is its spawn location.

The intrusion deck has its own discard pile. Whenever an enemy from the intrusion deck would leave play, it is placed in the discard pile for the intrusion deck. (*Any intrusion tokens sealed on it are returned to the intrusion bag.*) If the intrusion deck is empty, shuffle the intrusion discard pile back into the intrusion deck.

Illus. Seage

21/77

139

Character Assassination

SCANDAL ROCKS LEVY UNIVERSITY

Absent-minded professor? Or cyber terrorist?

Professor Teeling Anson, 52, was arrested today on suspicion of intent to commit cyberterrorism. The NAPD are currently not releasing information, but we at NewsNow have managed to secure a statement from the man whose brave efforts led to the capture of this terrorist in the making. Vovo Ozetti, a well-respected sysop at Haas-Bioroid spotted unauthorized changes to bioroid programming, and at his own risk uncovered a trail of deception across hundreds of forums and sites. The Professor, as his alias goes on The Network, was employed by Haas-Bioroid as a consultant but was supposedly using his access to reprogram bioroids with a sneakdoor, allowing him to turn off directives as well as issue his own instructions, intending to hold the public ransom for unknown reasons.
