

The Keeper of Knowledge

EASY / STANDARD

-X. X is half the number of Rezeki in play (rounded up).

-2. If you fail, the nearest **Program** enemy with patrol disengages from all investigators and moves once towards its patrol target.

-3. If you fail, gain 2 tags.

-4. If you fail, exhaust your Brain-Machine Interface and you must switch from cyberspace to meatspace or vice versa.

Blue Level Clearance

More paranoid citizens allege that biroids keep vids and analogs of their owners for upload to Haas-Bioroid during maintenance.

When checking the doom threshold, ignore doom on other cards.

Forced – At the end of the mythos phase:

Resolve 2 security breaches.
Forced – After the 'enemies attack' step of the enemy phase: Each ready **Program** enemy deals its horror value to a **Program** asset at its location. If it cannot and it has not moved this phase, resolve its patrol/hunter keyword (if it has one).

"Oh interesting... Although on the surface, the digital signatures present imply the attacker is Vovo Ozetti, the code is written in an entirely different idiom, as if someone was trying to appear as him."

(From now on, at the end of the mythos phase, resolve **two** security breaches.)

AGENDA
2B

Activation Command

Attic
Monolith

LOCATION

Meatspace. Console.

SYNC owns the hubs that direct Network traffic. Even the access point in an individual's home is corporation property, and altering the hardware or software in any way is a crime. In practice, the law isn't much enforced; plenty of tinkerers tweak or even rewrite entirely the hub to optimize its performance.

You hear The Professor's voice ringing in cyberspace, "I think I know who it is, that wily man. The hallmarks are there. I sometimes wonder what I did to him that would have led to this. Vovo seemed perfectly pleasant, even shared his tea with me on the times we bumped into each other on breaths. Thank you for your help thus far, I estimate I'm just over a third done."

AGENDA
3B

Vovo Ozetti

Resolve 2 security breaches.

You focus and find you are still in the university apartment. Checking your cyberspace location, you are still in the servers you were in before also. The Professor continues to work on his task. You shake it off and continue with your task before he gets overwhelmed.

Mark 1 assimilation in your Campaign Log. (Max once per game.)

AGENDA
4B

The Keeper of Knowledge

HARD / EXPERT

-X. X is the number of Rezeki in play.

-2. The nearest **Program** enemy with patrol disengages from all investigators and moves once towards its patrol target.

-3. Gain 2 tags.

-6. If you fail, exhaust your Brain-Machine Interface and you must switch from cyberspace to meatspace or vice versa.

1/77
1/155
1/34

"That it. Updates complete."

You breathe a sigh of relief as you hear The Professor's servers spin down, one after another, the connections to the network popping out of existence. You watch the remaining bioroids blink out as well, one by one, as the mysterious assailant terminates their processes.

Cyberwarfare

Any investigator can trigger the abilities on this card, regardless of location.

Spend 1 clues: Place 1 resource (*from the token pool*) on this card, as a cycle.

During your turn: Install a program from the repository at a revealed cyberspace location.

During your turn: Return a **Program** asset in play to the repository.

To install a program from the repository, spend the requisite number of cycles from this card to put that **Program** asset into play at a revealed cyberspace location. Max 1 **Program** asset at each location.

1 cycle: Mayfly.

2 cycles: Algernon.

2 cycles: Rezeki.

4 cycles: Darwin.

6 cycles: Aumakua.

Program assets defeated by horror are returned to the repository.

Security Breaches

Security breaches cannot be canceled.

To resolve a security breach, an investigator must draw the top card of the intrusion deck and spawn the enemy at its spawn location. For enemies with a random spawn location, reveal an intrusion token from the intrusion bag and seal it on the enemy. The breach point with that symbol is its spawn location.

The intrusion deck has its own discard pile. Whenever an enemy from the intrusion deck would leave play, it is placed in the discard pile for the intrusion deck. (*Any intrusion tokens sealed on it are returned to the intrusion bag.*) If the intrusion deck is empty, shuffle the intrusion discard pile back into the intrusion deck.

Character Assassination

SCANDAL ROCKS LEVY UNIVERSITY

Absent-minded professor? Or cyber terrorist?

Professor Teeling Anson, 52, was arrested today on suspicion of intent to commit cyberterrorism. The NAPD are currently not releasing information, but we at NewsNow have managed to secure a statement from the man whose brave efforts led to the capture of this terrorist in the making. Vovo Ozetti, a well-respected sysop at Haas-Bioroid spotted unauthorized changes to bioroid programming, and at his own risk uncovered a trail of deception across hundreds of forums and sites. The Professor, as his alias goes on The Network, was employed by Haas-Bioroid as a consultant but was supposedly using his access to reprogram bioroids with a sneakdoor, allowing him to turn off directives as well as issue his own instructions, intending to hold the public ransom for unknown reasons.

Mark 1 fragment in your Campaign Log.

Add this card to the victory display.

Neutralize All Threats

ASSET

150

120

Directive.

Permanent.

→ When you perform a successful attack, exhaust Neutralize All Threats: Deal +1 damage for that attack.

Forced – At the end of your turn, if there is a non-*Elite* enemy at your meatspace or cyberspace locations: Take 1 horror.

Illus. Tadas Sidlauskas (Edited)
