

Regardless of how one accesses the Network, PADs and other devices require a memory source to store the programs, apps, and system data essential for everyday operation. Holographic memory, commonly referred to as holo-mem, continues to be the most popular form of data storage for small devices such as PADs.

Cyberwarfare

Any investigator can trigger the abilities on this card, regardless of location.

M Spend 1 **clues**: Place 1 resource (*from the token pool*) on this card, as a cycle.

M During your turn: Install a program from the repository at a revealed cyberspace location.

M During your turn: Return a **Program** asset in play to the repository.

To install a program from the repository, spend the requisite number of cycles from this card to put that **Program** asset into play at a revealed cyberspace location. Max 1 **Program** asset at each location.

↳ 1 cycle: Mayfly.

↳ 2 cycles: Algernon.

↳ 2 cycles: Rezeki.

↳ 4 cycles: Darwin.

↳ 6 cycles: Aumakua.

Program assets defeated by horror are returned to the repository.
